

What Makes TruVista's Fiber-Optic Services Better?

The average American home now has **15 connected devices** – and that number is only growing! Don't get frustrated with a provider that only covers SOME of your internet needs.

1

TruVista's Fiber-Optic network is FUTURE PROOF.

Our technology is ready and able to support ALL your household internet needs for years to come. No infrastructure upgrade required!

Fiber means RELIABILITY.

Fiber technology transmits data via light wave, resulting in virtually ZERO signal loss or lag for seamless gaming, streaming, teleconferencing, and more!

2

3

Your data is SECURE under TruVista's Umbrella.

TruVista offers unmatched security services, protecting you and your family from nasty malware, ransomware, and phishing cyber-attacks, with Umbrella Easy Protect.

NO data caps. NO limits.

With absolutely NO data caps on our high-speed internet, you can use all the data you want...at all times! No limit.

4

5

TruVista delivers high speeds CONTINUOUSLY.

Our highly trained team of engineers proactively monitors the network. As traffic increases and your requirements change, they are able to remotely upgrade your system quickly.

TruVista also offers streaming Video, Voice, Security and Home Automation services on its fiber optic network, providing all the best in class services you need.
